MAXIM KURYLEV

Lead Business Analyst / Product Owner / AI Product Builder

Moscow, Russia | Remote / hybrid | Available for business travel

kourilev@mail.ru | +7 977 425-64-99 | Telegram: @maks16hd

PROFESSIONAL PROFILE

Over 8 years in logistics and digital products, spanning enterprise TMS, Last Mile and CRM for international logistics. I investigate real workflows, translate needs into requirements and support delivery through acceptance.

I connect business needs, user experience and engineering execution. I use AI for requirements analysis and prototyping, and build working MVPs with Codex.

PROFESSIONAL EXPERIENCE

Nexus Logistics | Product Owner

09.2026 - Present

Leading a CRM for a team of 20-30 users, from discovery and requirements to MVP, deployment and a pilot with real users.

• Defining user stories, use cases, business rules, acceptance criteria and UAT scenarios; evolving the backlog through user feedback.

• Established PostgreSQL and Docker deployment with backups, migrations, health checks and recovery without overwriting user data.

• Built a logistics and international trade news agent: collection, filtering, ranking, deduplication, editorial drafts and Telegram approval before publishing to a test site.

Magnit | Lead Business Analyst

04.2024 - 10.2026

New TMS for a nationwide retailer: 55 distribution centres, 30,000+ stores, around 7,000 vehicles, 10,000+ daily orders and 120+ integration interactions.

• Assessed 15+ systems, mapped 18+ processes and identified 30+ manual operations. Developed AS-IS, GAP and TO-BE models; contributed to RFI/RFP and evaluation of 10+ vendors.

• Defined requirements for three modules: order management, dispatch operations and accounting. Covered BR/FR/NFR, roles, statuses, integrations and acceptance criteria; the TMS was at MVP stage.

• Supported automation of dispatch assignments, claims and freight-forwarding documents. Mapped 30+ data fields and conducted UAT; documents rolled out across 55 distribution centres.

Komus | Business Analyst / Product Owner responsibilities

02.2019 - 01.2024

Acted as Product Owner for Last Mile: a mobile app, dispatcher workspace and routing solution serving 300+ drivers. Managed requirements, backlog and priorities with an external development team.

• Specified delivery jobs, statuses, maps, GPS, documents, chat and integrations; tested and accepted changes.

• Supported TMS, WMS, ERP, YMS and a supplier portal, including distribution centre launches. Analysed data using SQL and Excel.

DSIA | Logistics / Customer Service Specialist

10.2017 - 01.2019

Contributed to Logistar implementations across WMS, TMS, OMS and SCM. Collaborated with the French engineering team and trained and worked at the Nantes headquarters.

• Analysed customer needs, specified requirements, tested changes and investigated logs. Supported system launches and user training.

LeaderTelecom | Information Security Specialist

01.2015 - 10.2017

Worked with Russian and international corporate clients on SSL certificates and internet security.

• Provided technical support and consultancy, negotiated in foreign languages, prepared proposals and supported deals.

SELECTED OUTCOMES

90 min - Saved per dispatcher, daily. Automated assignment creation for 70 employees. Estimated capacity released: up to 105 person-hours per day.

30 to 10 - Minutes per claim. Around 67% less time, based on user estimates. A shared workspace replaced scattered folders.

55 - Distribution centres. Freight-forwarding documents rolled out to support regulatory compliance; 30+ data fields mapped across systems.

SKILLS & TOOLS

Discovery & analysis: AS-IS / TO-BE · GAP analysis · Customer Journey Mapping · User Story Mapping

Product & delivery: MVP · Backlog · Roadmap · Prioritisation · User Stories · Use Cases · UAT · DoR / DoD

Systems & data: TMS · WMS · ERP · OMS · YMS · SAP · SQL · API integrations

AI & tools: Codex · AI-assisted prototyping · Jira · Confluence · Miro · MS Visio · VS Code · Docker · PostgreSQL

EDUCATION & DEVELOPMENT

2018 · Institute of International Trade and Law - World Economy

2018 · National Institute of Business - Finance and Credit

2013 · Derzhavin Tambov State University - French and English Philology and Literature

2025 · API Service Architecture and Integration Design

LANGUAGES

Russian: native | English: B2 | French: C1
